thank you Marty.

We will coordinate through Christine.

I have forwarded your request to the Area Command's Environmental Unit Leader (OSC Christine Wagner). She is your primary contact.

Christine: As evidenced by the viewer fiasco today and several incidences of the HQs EOC thinking we did not send data when we did, there is a huge disconnect between Terry and the HQs EOC. I strongly suggest they give you one point of contact who can insure Area Command is effectively communicating with HQs OEM.

Hi Marty:

Two things. I have been getting multiple emails containing R6, R8 and R9 data over the past few days. I want to make sure that I have received all of the validated data generated so far.

Is there any way you can send me a draft summary or a complete file of all data submitted to HQ?

The second thing. Is there a mechanism in place that the Regions or the Area command can send us a notice of what samples are anticipated to be sent to us for the next day. We did this in BP spill and Katrina, and it help us to know what to anticipate, so that something does not get lost.

Let me know.

Thanks Marty

Terry
